Cloud and Platform Architect | Solutions Architect

SUMMARY

Cloud architect and engineering leader with broad experience across platform design, modernization strategy, and execution in enterprise environments.

- Builds high-performing teams and delivers complex programs by aligning engineering execution with clear stakeholder communication and measurable outcomes.
- Specializes in modernizing existing platforms for cloud adoption, reliability, and cost efficiency while preserving delivery momentum.

EXPERIENCE

Principal Cloud Consultant, Nimbus Cloud Consulting

2022 - Present

Designed and delivered cloud platform solutions for enterprise clients, combining architecture strategy with hands-on implementation across networking, security, automation, and observability.

- Led a large contact-center modernization program and coordinated engineering delivery across APIs, integration services, and infrastructure automation.
- Designed a cross-platform compute architecture that reduced licensing costs and improved startup performance for analytics workloads.
- Planned and guided migration of virtual desktop infrastructure for a distributed workforce with resilient networking and identity integration.
- Partnered with product teams to define enterprise-ready controls that unblocked secure platform adoption in regulated environments.
- Engineered a high-throughput network telemetry pipeline to monitor firewall health and surface proactive reliability insights.
- Built and maintained backend services in TypeScript and PostgreSQL, improving test quality and release confidence through stronger coverage.
- Implemented a high-volume log transport and normalization pipeline to improve SIEM visibility and operational response.
- Created reusable Terraform modules for core platform capabilities, accelerating new project delivery and improving policy consistency.
- Designed secure multi-account cloud network patterns and published infrastructure modules for repeatable enterprise deployments.
- Contributed to an internal AI-assisted opportunity analysis workflow that generated structured summaries for architecture planning.
- Delivered analytics dashboards using serverless query services to replace brittle legacy reporting workflows.
- Authored infrastructure modules to close platform capability gaps and reduce custom implementation effort for project teams.

Senior Cloud Architect, Northbridge University

2019 - 2022

Led a multi-year cloud modernization initiative, migrating critical workloads to managed services and introducing self-service infrastructure patterns for delivery teams.

- Established secure hybrid connectivity between on-prem and cloud environments using firewall segmentation, VPN, and transit network patterns.
- Built repeatable delivery pipelines that enabled daytime production deployments with lower change risk and improved rollback confidence.

- Developed a compliance tracking platform that automated evidence collection and reduced audit preparation time from days to hours.
- Reduced infrastructure provisioning time from hours to minutes through standardized templates and automated validation workflows.

Outcomes:

- Directed phased migration of legacy workloads to cloud-hosted services, reducing data center footprint and operating overhead.

Infrastructure Planner, Northbridge University

2017 - 2018

Developed short- and long-term infrastructure roadmaps, balancing reliability, security, cost, and organizational change management for major technology initiatives.

Outcomes:

- Consolidated infrastructure operations into a simplified support model that improved resilience, reduced toil, and strengthened security posture.

Project Manager, Northbridge University

2016 - 2017

Managed competitive procurement and implementation programs for voice, network, and security platform refreshes across a multi-site environment.

Outcomes:

- Delivered successful RFP outcomes for network and security modernization with measurable reliability and lifecycle improvements.
- Built business cases and implementation plans for enterprise voice modernization, clarifying cost and execution tradeoffs.

SKILLS

Technologies (Architectural Experience): Amazon AWS (see below)

CORE EXPERTISE

Cloud-Native Architecture | Systems Architecture | Amazon Web Services (AWS) | Multi-Cloud Architecture | Highly-Available Architecture | Technical Leadership | Project Leadership | CI/CD | Observability and Monitoring | Cloud Cost Optimization | Cloud Security and Compliance

EDUCATION

Diploma, Computer Engineering Technology

2003

Metro Technical College

CERTIFICATIONS

AWS Certified AI Practitioner — Amazon Web Services, Dec 2025 – Exp. Dec 2028

AWS Certified Solutions Architect Professional — Amazon Web Services, Jan 2024 – Exp. Jan 2027

AWS Certified Developer – Associate — Amazon Web Services, Jun 2023 – Exp. Jun 2026

AWS Certified Security – Specialty — Amazon Web Services, May 2023 – Exp. May 2026

AWS Certified Solutions Architect – Associate — Amazon Web Services, Jan 2024 – Exp. Jan 2027

AWS Certified Cloud Practitioner — Amazon Web Services, Jul 2022 – Exp. Jan 2027

Microsoft Certified: Azure Fundamentals — Microsoft, Jul 2020

Microsoft Certified: Azure Solutions Architect Expert — Microsoft, Aug 2021 – Exp. Aug 2022
